

New for 2010: Banshee SPITFIRE

The Banshee Spitfire Get back to the roots of mountain biking. I'm not talking about foam mushroom top helmets and fully rigid bikes with whack geometry but rather charging climbs and slaying downhills faster than any of your bros. The Spitfire was designed with this exactly in mind. It is faster, cooler, stronger and lighter than your buddy's bike and will show itself off at any trail you take it to. some are calling it the XC rider's DH bike, or the DH rider's XC bike but we're simply calling it ridiculous amounts of fun!

FEATURES:

- 5" / 130 mm of rear travel
- VF4B suspension system
- ISCG 05 chainguide mount
- 2 shock positions for geometry changes
- 5lbs for medium frame (lighter than last year's Pyre)
- cable guides for on-the-fly adjust seatposts
- tapered headtube
-
